A herd of buffalo can move only as fast as the slowest buffalo. When the herd is hunted, it is the slowest and weakest ones at the back that are killed first. This natural selection is good for the herd as a whole, because the general speed and health of the whole group keeps improving by the regular culling of the weakest members. In much the same way, the human brain can only operate as fast as the slowest brain cells. Excessive intake of alcohol, we all know, kills brain cells, but naturally it attacks the slowest and weakest brain cells first. In this way, regular consumption of beer eliminates the weaker brain cells, making the brain a faster and more efficient machine. That's why you always feel smarter after a few beers. – Author Unknown

Canadian Beer Study

We received some sad news today about beer from our friends at Molson Brewing. You have to hope that This study is flawed, but the evidence seems irrefutable. Yesterday, scientists for Health Canada suggested that the results of a recent analysis revealed the slight presence of the female hormone, estrogen in most beers, and suggested that men should take a closer look at their beer consumption levels.

The theory is that drinking beer makes men more effeminate. To test the theory, 100 men were each fed 6 pints of beer within a one-hour period. It was then observed that 100% of the men gained weight, talked excessively without making sense, became overly emotional, couldn't drive,

failed to think rationally, argued over nothing, had to sit down while urinating, couldn't perform sexually, and refused to apologize when wrong.

No further testing is planned.

The Beer Lovers Prayer

OUR LAGER WHICH ART IN BARRELS HALLOWED BY THY DRINK
THY WILL BE DRUNK, I WILL BE DRUNK, AT HOME, AS IT IS IN THE PUB
GIVE US THIS DAY OUR FOAMY HEAD
AND FORGIVE OUR SPILLAGE AS WE FORGIVE THOSE WHO SPILL AGAINST US
AND LEAD US NOT TO INCARCERATION
BUT DELIVER US FROM HANGOVERS
FOR THINE IS THE BEER, THE BITTER, AND THE LAGER
FOREVER AND EVER BARLEY 4 MEN.
